

Dual Zone Deflector Kit

The Dual Zone Deflector Kit makes cooking on the Big Green Egg even easier and more versatile. It is the ideal way to expand your cooking surface, cook food directly and indirectly simultaneously, and cook at different levels. Would you like to add smoking wood, for example or cook caveman-style while grilling? Thanks to the practical handles, you can lift the basket out of the EGG safely and quickly in one easy movement and put it back on just as easily.

Switch between different zones

Place one Split Deflector in the basket to create a direct and indirect zone or combine them for a complete heat shield.

Even heat & more space

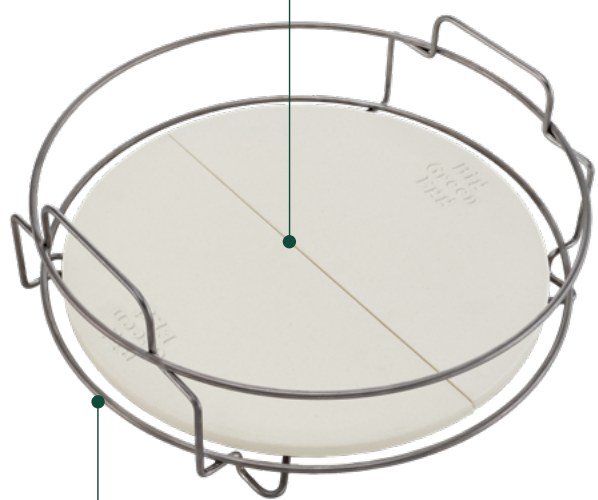

The advanced ceramic ensures heat is distributed more evenly. Optimised for a larger cooking surface and perfect airflow.

Makes cooking more versatile

Combine with the Half Cast Iron Grid, Half Cast Iron Plancha, Half Perforated Grid and the 2-Piece Multi Level Rack for even more possibilities.

Ceramic Split Deflectors (2)

Together they form a complete ceramic heat shield, but can also be used to cook directly and indirectly at the same time.

Improved stainless steel Deflector Basket

With enough space for unobstructed airflow and easier to remove when the basket is hot.

RECOMMENDED FOR USE WITH HALF GRIDS
